### PROGRAMME-SPECIFIC LEARNING OUTCOMES FOR BDS PROGRAM

As per DCI BDS Course Regulation 2007 Gazette at the completion of the undergraduate training programme the graduates shall be competent in the following.-

#### COMPETENCIES

##### General Skills

Apply knowledge & skills in day to day practice

Apply principles of ethics

Analyse the outcome of treatment

Evaluate the scientific literature and information to decide the treatment Participate and involve in professional bodies

Self-assessment & willingness to update the knowledge & skills from time to time Involvement in simple research projects

Minimum computer proficiency to enhance knowledge and skills

Refer patients for consultation and specialized treatment

Basic study of forensic odontology and geriatric dental problems

##### Practice Management

Evaluate practice location, population dynamics & reimbursement mechanism Co-ordinate & supervise the activities of allied dental health personnel Maintain all records

Implement & monitor infection control and environmental safety programs Practice within the scope of one's competence

##### Communication & Community Resources

Assess patients goals, values and concerns to establish rapport and guide patient care Able to communicate freely, orally and in writing with all concerned

Participate in improving the oral health of the individuals through community activities.

##### Patient Care – Diagnosis

Obtaining patient's history in a methodical way

Performing thorough clinical examination

Selection and interpretation of clinical, radiological and other diagnostic information Obtaining appropriate consultation

Arriving at provisional, differential and final diagnosis

##### Patient Care – Treatment Planning

Integrate multiple disciplines into an individual comprehensive sequence treatment plan using diagnostic and prognostic information

Able to order appropriate investigations

##### Patient Care – Treatment

- Recognition and initial management of medical emergencies that may occur during Dental treatment
- Perform basic cardiac life support
- Management of pain including post operative
- Administration of all forms of local anaesthesia
- Administration of intra muscular and venous injections
- Prescription of drugs, pre operative, prophylactic and therapeutic requirements

- Uncomplicated extraction of teeth
- Transalveolar extractions and removal of simple impacted teeth
- Minor oral surgical procedures
- Management of Oro-facial infections
- Simple orthodontic appliance therapy
- Taking, processing and interpretation of various types of intra oral radiographs.
- Various kinds of restorative procedures using different materials available.
- Simple endodontic procedures
- Removable and fixed prosthodontics
- Various kinds of periodontal therapy

### ORAL MEDICINE & RADIOLOGY

- Able to identify precancerous and cancerous lesions of the oral cavity and refer to the concerned speciality for their management
- Should have an adequate knowledge about common laboratory investigations and interpretation of their results.
- Should have adequate knowledge about medical complications that can arise while treating systemically compromised patients and take prior precautions/ consent from the concerned medical specialist.
- Have adequate knowledge about radiation health hazards, radiations safety and protection.
- Competent to take intra-oral radiographs and interpret the radiographic findings
- Gain adequate knowledge of various extra-oral radiographic procedures, TMJ radiography and sialography.
- Be aware of the importance of intra- and extra-oral radiographs in forensic identification and age estimation
- Should be familiar with jurisprudence, ethics and understand the significance of dental records with respect to law

### PAEDIATRIC & PREVENTIVE DENTISTRY

- Able to instill a positive attitude and behaviour in children towards oral health and understand the principles of prevention and preventive dentistry right from birth to adolescence.
- Able to guide and counsel the parents in regards to various treatment modalities including different facets of preventive dentistry.
- Able to treat dental diseases occurring in child patient.
- Able to manage the physically and mentally challenged disabled children effectively and efficiently, tailored to the needs of individual requirement and conditions.

### ORTHODONTICS & DENTOFACIAL ORTHOPAEDICS

- Understand about normal growth and development of facial skeleton and dentition.
- Pinpoint aberrations in growth process both dental and skeletal and plan necessary treatment
- Diagnose the various malocclusion categories
- Able to motivate and explain to the patient (and parent) about the necessity of treatment
- Plan and execute preventive orthodontics (space maintainers or space regainers)
- Plan and execute interceptive orthodontics (habit breaking appliances)
- Manage treatment of simple malocclusion such as anterior spacing using removable appliances
- Handle delivery and activation of removable orthodontic appliances
- Diagnose and appropriately refer patients with complex malocclusion to the specialist

### PERIODONTOLOGY

- Diagnose the patients periodontal problem, plan and perform appropriate periodontal treatment
- Competent to educate and motivate the patient
- Competent to perform thorough oral prophylaxis, subgingival scaling, root planning and minor periodontal surgical procedures
- Give proper post treatment instructions and do periodic recall and evaluation

- Familiar with concepts of osseointegration and basic surgical aspects of implantology

### PROSTHODONTICS AND CROWN & BRIDGE

- Able to understand and use various dental materials
- Competent to carry out treatment of conventional complete and partial removable dentures and fabricate fixed partial dentures
- Able to carry out treatment of routine prosthodontic procedures.
- Familiar with the concept of osseointegration and the value of implant-supported Prosthodontic procedures

### CONSERVATIVE DENTISTRY AND ENDODONTICS

- Competent to diagnose all carious lesions
- Competent to perform Class I and Class II cavities and their restoration with amalgam
- Restore class V and Class III cavities with glass ionomer cement
- Able to diagnose and appropriately treat pulpally involved teeth (pulp capping procedures)
- Able to perform RCT for anterior teeth
- Competent to carry out small composite restorations
- Understand the principles of aesthetic dental procedures

### ORAL & MAXILLOFACIAL SURGERY

- Able to apply the knowledge gained in the basic medical and clinical subjects in the management of patients with surgical problems
- Able to diagnose, manage and treat patients with basic oral surgical problems
- Have a broad knowledge of maxillofacial surgery and oral implantology
- Should be familiar with legal, ethical and moral issues pertaining to the patient care and communication skills
- Should have acquired the skill to examine any patient with an oral surgical problem in an orderly manner
- Understand and practice the basic principles of asepsis and sterilisation
- Should be competent in the extraction of the teeth under both local and general anaesthesia
- Competent to carry out certain minor oral surgical procedure under LA like trans-alveolar extraction, frenectomy, dento alveolar procedures, simple impaction, biopsy, etc.
- Competent to assess, prevent and manage common complications that arise during and after minor oral surgery
- Able to provide primary care and manage medical emergencies in the dental office
- Familiar with the management of major oral surgical problems and principles involved in the in- patient management

### PUBLIC HEALTH DENTISTRY

- Apply the principles of health promotion and disease prevention
- Have knowledge of the organization and provision of health care in community and in the hospital service
- Have knowledge of the prevalence of common dental conditions in India.
- Have knowledge of community based preventive measures
- Have knowledge of the social, cultural and env. Factors which contribute to health or illness.
- Administer and hygiene instructions, topical fluoride therapy and fissure sealing.
- Educate patients concerning the aetiology and prevention of oral disease and encourage them to assure responsibility for their oral health.

## PROGRAMME-SPECIFIC LEARNING OUTCOMES FOR MDS PROGRAM AS PER DCI MDS GAZETTE No.DE-87-2017

Seema Dental College is presently running **MDS (Master of Dental Surgery)** programme in **06 dental specialties/courses as given below**. These courses are recognized by DCI and affiliated to HNB Garhwal University and HNB Uttarakhand Medical Education University, Dehradun.

### List of PG Programmes Offered

PG Programmes
MDS Course
MDS (Oral Medicine & Radiology)
MDS (Orthodontics and Dentofacial Orthopaedics)
MDS (Prosthodontics and Crown & Bridge)
MDS (Pediatric and Preventive Dentistry)
MDS (Periodontology)
MDS (Conservative Dentistry & Endodontics)

## GOALS AND OBJECTIVES OF THE MDS CURRICULUM

### 25. (25) GOALS.\_

The goals of the post-graduate training in various specialties is to train the graduate in Dental Surgery who will,

- (i) practice respective speciality efficiently and effectively, backed by scientific knowledge and skill;
- (i) exercise empathy and a caring attitude and maintain high ethical standards;
- (iii) continue to evince keen interest in professional education in the speciality and allied specialties whether in teaching or practice;
- (iv) willing to share the knowledge and skills with any learner, junior or a colleague;
- (v) to develop the faculty for critical analysis and evaluation of various concepts and views and to adopt the most rational approach.

### 26. (26) OBJECTIVES.\_

The objective of the post-graduate training is to train a student so as to ensure higher competence in both general and special area of interest and prepare him or her for a career in teaching, research and speciality practice. A student must achieve a high degree of clinical proficiency in the subject and develop competence in research and its methodology in the concerned field.

The objectives to be achieved by the candidate on completion of the course may be classified as under:-

1. (a) Knowledge (Cognitive domain)
2. (b) Skills (Psycho motor domain)
3. (c) Human values, ethical practice and communication abilities

**(a) KNOWLEDGE:**

1. (i) demonstrate understanding of basic sciences relevant to speciality;
2. (ii) describe aetiology, pathophysiology, principles of diagnosis and management of common problems within the speciality in adults and children;
3. (iii) identify social, economic, environmental and emotional determinants in a given case and take them into account for planned treatment;
4. (iv) recognise conditions that may be outside the area of speciality or competence and to refer them to the concerned specialist;
5. (v) update knowledge by self study and by attending courses, conferences and seminars pertaining to speciality;
6. (vi) undertake audit, use information technology and carry out research in both basic and clinical with the aim of publishing or presenting the work at various scientific gathering;

**(b) SKILLS:**

1. (i) take a proper clinical history, examine the patient, perform essential diagnostic procedures and order relevant tests and interpret them to come to a reasonable diagnosis about the condition;
2. (ii) acquire adequate skills and competence in performing various procedures as required in the speciality.

**(c) HUMAN VALUES, ETHICAL PRACTICE AND COMMUNICATION ABILITIES.**

1. (i) adopt ethical principles in all aspects of practice;
2. (ii) foster professional honesty and integrity;
3. (iii) deliver patient care irrespective of social status, caste, creed, or religion of the patient;
4. (iv) develop communication skills, to explain various options available and obtain a true informed consent from the patient;
5. (v) provide leadership and get the best out of his team in a congenial working atmosphere;
6. (vi) apply high moral and ethical standards while carrying out human or animal research;
7. (vii) be humble and accept the limitations in his knowledge and skill and to ask for help from colleagues when needed;
8. (viii) respect patient's rights and privileges including patient's right to information and right to seek a second opinion.

The programme-specific Learning Outcomes of various MDS Programme/Courses are as follows-

### MDS (PEDIATRIC AND PREVENTIVE DENTISTRY)

Pediatric Dentistry is an age-defined specialty that provides comprehensive preventive and therapeutic oral health care for infants and children through adolescence, including those with special healthcare needs. Students are trained in aspects of child psychology, behavior management, preventive dentistry, interceptive orthodontics, management of decayed teeth and traumatic injuries. They are trained in radiology pertaining to children, dental health education and school dental health programmes.

**OBJECTIVES:** The following objectives are laid out to achieve the goals of the course. These are to be achieved by the time the candidate completes the course. These objectives may be considered under the following subtitles.

**KNOWLEDGE:** At the end of 36 months of training, the candidates should be able:

- To have adequate knowledge of Child psychology and Behavior management techniques
- To have knowledge of the etiology, patho-physiology, diagnosis and treatment planning of various common problems
- To understand the principles of prevention and preventive dentistry right from birth to adolescence
- To Know various treatment modalities to prevent and intercept malocclusion
- To have knowledge of aberrant oral habits, diagnosis and available habit breaking treatment options

### SKILLS

- Obtain proper clinical history, methodological examination of the patient, perform essential diagnostic procedures and interpret them, and arrive at a reasonable diagnosis and treat appropriately.
- Competent to treat dental diseases which are occurring in child patient.
- Manage to repair and the lost/tooth structure to maintain harmony between both hard and soft tissues of the oral cavity.
- Manage the disabled children effectively and effectively, tailored to the needs of individual requirement and conditions.

### ATTITUDES

- Develop an attitude to adopt ethical principles in all aspects of Pedodontics practice.
- Professional honesty and integrity are to be fostered.
- Treatment care is to be delivered irrespective of the social status, cast creed, and religion of

the patients.

- Willingness to share the knowledge and clinical experience with professional colleagues.
  - Willingness to adopt, after a critical assessment, new methods and techniques of pedodontic management developed from time to time, based on scientific research, which are in the best interest of the child patient.
  - Respect child patient's rights and privileges, including child patient's right to information and right to seek a second opinion.
  - Develop an attitude to seek opinion from allied dental specialties, as and when required.
- Communication Skills and Ability

- Develop adequate communication skills to manage child patient, explaining various treatment options to parents and obtain a true informed consent from them for the most appropriate treatment available at that point of time
- Develop the ability to communicate with professional colleagues
- Develop ability to teach undergraduates, present seminars and develop leadership skills.

### MDS (CONSERVATIVE DENTISTRY & ENDODONTICS)

The students are trained to have complete knowledge of aetiology, pathophysiology, diagnosis and management of dental caries, trauma, restorative and endodontic procedures. Students use advanced materials like composites, glass ionomers, varnishes and sealants, dentin bonding and light cure systems. The students are also trained in endodontic procedures using advanced technologies like apex locators, radiovisiography and latest root canal obturation methods.

**OBJECTIVES:** The following objectives are laid out to achieve the goals of the course. These are to be achieved by the time the candidate completes the course. These objectives may be considered under the following subtitles.

**KNOWLEDGE:** At the end of 36 months of training, the candidates should be able to:

- Describe etiology, pathophysiology, periapical diagnosis and management of common restorative situations, endodontic situations that will include contemporary management of dental caries, management of trauma and pulpal pathosis including periodontal situations.
- Demonstrate understanding of basic sciences as relevant to conservative/ restorative dentistry and Endodontics.
- Identify social, economic, environmental and emotional determinants in a given case or community and take them into account for planning and execution at individual and community level.
- Ability to master differential diagnosis and recognize conditions that may require multi disciplinary approach or a clinical situation outside the realm of the specialty, which he or she

### MDS (PROSTHODONTICS AND CROWN & BRIDGE)

The prosthodontic graduate training programme imparts knowledge pertaining to restoration and maintenance of oral function, health, comfort and appearance by the replacement of missing and lost natural teeth. Students are trained on complete dentures, cast partial dentures, crown and bridge work, implant supported prosthesis through didactic and clinical learning. They undergo extensive training using state-of-the-art modern equipment and materials of international standards to enhance their preclinical skills. They also get trained in casting and ceramic work in the Ceramo-metal Laboratory.

**AIM:** To train the dental graduates so as to ensure higher level of competence in both general and specialty areas of Prosthodontics and prepare candidates with teaching, research and clinical abilities including prevention and after care in Prosthodontics – removable dental prosthodontics, fixed dental prosthodontics (Crown & Bridge), implantology, maxillofacial prosthodontics and esthetic dentistry.

**GENERAL OBJECTIVES OF THE COURSE:** Training program for the dental graduates in Prosthetic dentistry– removable dental prosthodontics, fixed dental prosthodontics (Crown & Bridge), implantology, maxillofacial prosthodontics and esthetic dentistry and Crown & Bridge including Implantology is structured to achieve knowledge and skill in theoretical and clinical laboratory, attitude, communicative skills and ability to perform research with a good understanding of social, cultural, educational and environmental background of the society.

- To have adequate acquired knowledge and understanding of applied basic and systemic medical sciences, both in general and in particularly of head and neck region.
- The postgraduates should be able to provide Prosthodontic therapy for patients with competence and working knowledge with understanding of applied medical, behavioral and clinical science, that are beyond the treatment skills of the general BDS graduates and MDS graduates of other specialties,
- To demonstrate evaluative and judgment skills in making appropriate decisions regarding prevention, treatment, after care and referrals to deliver comprehensive care to patients.

At the end of 3 years of training the candidate should be able to acquire adequate knowledge of the discipline.

#### KNOWLEDGE:

- The candidate should possess knowledge of applied basic and systemic medical sciences.
- On human anatomy, embryology, histology, applied in general and particularly to head and neck, Physiology & Biochemistry, Pathology Microbiology & virology; health and diseases of various systems of the body (systemic) principles in surgery and medicine, pharmacology, nutrition, behavioral science, age changes, genetics, Immunology, Congenital defects & syndromes and Anthropology, Bioengineering, Bio-medical & Biological Principles

- The student shall acquire knowledge of various Dental Materials used in the specialty and be able to provide appropriate indication, understand the manipulation characteristics, compare with other materials available, be adept with recent advancements of the same.
- Students shall acquire knowledge and practice of history taking, Diagnosis, treatment planning, prognosis, record maintenance of oral, craniofacial and systemic region.
- Ability for comprehensive rehabilitation concept with pre prosthetic treatment plan including surgical re-evaluation and prosthodontic treatment planning, impressions, jaw relations, utility of face bows, articulators, selection and positioning of teeth, teeth arrangement for retention, stability, esthetics, phonation, psychological comfort, fit and insertion.
- Instructions for patients in after care and preventive Prosthodontics and management of failed restorations shall be possessed by the students.
- Understanding of all the applied aspects of achieving physical, psychological well-being of the patients for control of diseases and / or treatment related syndromes with the patient satisfaction and restoring function of Cranio mandibular system for a quality life of a patient.
- Ability to diagnose and plan treatment for patients requiring Prosthodontic therapy
- Ability to read and interpret radiographs, and other investigations for the purpose of diagnosis and treatment planning.
- The theoretical knowledge and clinical practice shall include principles involved for support, retention, stability, esthetics, phonation, mastication, occlusion, behavioral, psychological, preventive and social aspects of Prosthodontics science of Oral and Maxillofacial Prosthodontics and Implantology
- Tooth and tooth surface restorations, Complete denture Prosthodontics, removable partial denture Prosthodontics, fixed prosthodontics and maxillofacial and Craniofacial Prosthodontics, implants and implant supported Prosthodontics, T.M.J. and occlusion, craniofacial esthetics, and biomaterials, craniofacial disorders, problems of psychogenic origin.
- Should have knowledge of age changes, geriatric psychology, nutritional considerations and prosthodontic therapy in the aged population.
- Should have ability to diagnose failed restoration and provide prosthodontic therapy and after care.
- Should have essential knowledge on ethics, laws, and Jurisprudence and Forensic Odontology in Prosthodontics.
- Should know general health conditions and emergency as related to prosthodontics treatment like allergy of various materials and first line management of aspiration of prosthesis
- Should identify social, cultural, economic, environmental, educational and emotional determinants of the patient and consider them in planning the treatment.
- Should identify cases, which are outside the area of his specialty/competence, refer them to appropriate specialists and perform interdisciplinary case management.
- To advice regarding case management involving surgical and interim treatment

- Should be able to communicate in simple understandable language with the patient and explain the principles of prosthodontics to the patient. He/She should be able to guide and counsel the patient with regard to various treatment modalities available.
- To develop the ability to communicate with professional colleagues through various media like Internet, e-mails, videoconferences etc. to render the best possible treatment. Should demonstrate good explanatory and demonstrating ability as a teacher in order to facilitate learning among students

### MDS (ORTHODONTICS AND DENTOFACIAL ORTHOPAEDICS)

The students are trained in immaculate history taking, methodological examination of patient, performing diagnostic procedures and management of dentofacial deformities. Students fabricate orthodontic appliances by conducting intricate wire bending procedures. The department imparts orthodontic treatment to a large percentage of the local population and the students of SDCH by the latest fixed orthodontic techniques including McLaughlin, Bennett & Traversy technique. The department caters to cleft lip and palate rehabilitation by multi-disciplinary approach. Orthognathic surgeries, distraction osteogenesis, implants and lingual orthodontics are some of the special interests of the department.

**OBJECTIVES:** The following objectives are laid out to achieve the goals of the course. These are to be achieved by the time the candidate completes the course. The training programme in Orthodontics is to structure and achieve the following objectives.

At the end of 3 years of training the candidate should be able to acquire adequate knowledge of the discipline.

#### KNOWLEDGE:

1. The dynamic interaction of biologic processes and mechanical forces acting on the stomatognathic system during orthodontic treatment
2. The etiology, pathophysiology, diagnosis and treatment planning of various common Orthodontic problems
3. Various treatment modalities in Orthodontics – preventive, interceptive and corrective.
4. Basic sciences relevant to the practice of Orthodontics
5. Interaction of social, cultural, economic, genetic and environmental factors and their relevance to management of oro- facial deformities
6. Factors affecting the long-range stability of orthodontic correction and their management
7. Personal hygiene and infection control, prevention of cross infection and safe disposal of hospital waste, keeping in view the high prevalence of Hepatitis and HIV and other highly contagious diseases.

## Seema Dental College and Hospital

(First Post Graduate Dental College of The State)

Recognized by:  
Dental Council of India  
vide Govt. Gazette Notification No.  
V-12017/49/2001-DE dated 25/06/2008  
Awarded As The Best Dental College

Virbhadra Road, Post Office : Pashulok  
Rishikesh-249 203 (Uttarakhand)  
Mobile: +91-9837087627  
E-mail : sdchquery@gmail.com  
Web : www.seemadentalcollege.org

### SKILLS

1. To obtain proper clinical history, methodical examination of the patient, perform essential diagnostic procedures, and interpret them and arrive at a reasonable diagnosis about the Dento-facial deformities.
2. To be competent to fabricate and manage the most appropriate appliance – intra or extra oral, removable or fixed, mechanical or functional, and active or passive – for the treatment of any orthodontic problem to be treated singly or as a part of multidisciplinary treatment of oro-facial deformities. Attitude: 1. Develop an attitude to adopt ethical principles in all aspects of Orthodontic practice. 2. Professional honesty and integrity are to be fostered
3. Treatment care is to be delivered irrespective of the social status, cast, creed and religion of the patients.
4. Willingness to share the knowledge and clinical experience with professional colleagues
5. Willingness to adopt, after a critical assessment, new methods and techniques of orthodontic management developed from time to time based on scientific research, which are in the best interest of the patient
6. Respect patients' rights and privileges, including patients right to information and right to seek a second opinion
7. Develop attitude to seek opinion from allied medical and dental specialists as and when required.

### MDS (ORAL MEDICINE & RADIOLOGY)

"Mouth is the mirror of the body"; most diseases reflect in the oral cavity with various presentations. This department sits at the interface between dentistry and medicine and trains the novice dental student about oral healthcare of patients with chronic, recurrent and medically related disorders of the oral and maxillofacial region with their diagnosis and non- surgical management. Oral and Maxillofacial Radiology is the speciality of dentistry and discipline of radiology concerned with the production and interpretation of images and data produced by all modalities of radiant energy that are used for the diagnosis and management of diseases, disorders and conditions of the oral and maxillofacial region.

At the end of 3 years of training the candidate should be able to acquire adequate knowledge of the discipline.

**KNOWLEDGE:** Theoretical, Clinical and practical knowledge of all oral mucosal lesions, skeletal involvement of maxillofacial region, diagnostic procedures pertaining to them and latest information of imaging modules.

**SKILLS:** Three important skills need to be imparted in maxillofacial diseases

1. Diagnostic skill in recognition of oral diseases with radiographic diagnosis and their management
2. Research skills in handling scientific problems pertaining to oral treatment
3. Clinical and Didactic skills in encouraging younger doctors to attain learning objectives

**ATTITUDES:** The positive mental attitude and the persistence of continued learning need to be inculcated

### **MDS (PERIODONTOLOGY)**

Periodontics encompasses the prevention, diagnosis and treatment of diseases of the supporting and surrounding tissues of the teeth. Students are trained in case analysis, treatment planning, and maintenance, supportive and surgical periodontal therapy. Knowledge on techniques of muco-gingival surgeries, resective and reconstructive osseous surgeries and implantology is imparted to the students.

**OBJECTIVES:** The following objectives are laid out to achieve the goals of the course.

At the end of 3 years of training the candidate should be able to acquire adequate knowledge of the discipline.

#### **KNOWLEDGE:**

- Discuss historical perspective to advancement in the subject proper and related topics.
- Describe etiology, pathogenesis, diagnosis and management of common periodontal diseases with emphasis on Indian population
- Familiarize with the biochemical, microbiologic and immunologic genetic aspects of periodontal pathology
- Describe various preventive periodontal measures
- Describe various treatment modalities of periodontal disease from historical aspect to currently available ones
- Describe interrelationship between periodontal disease and various systemic conditions
- Describe periodontal hazards due to estrogenic causes and deleterious habits and prevention of it
- Identify rarities in periodontal disease and environmental/Emotional determinates in a given case
- Recognize conditions that may be outside the area of his/her Speciality/competence and refer them to an appropriate Specialist
- Decide regarding non-surgical or surgical management of the case

(First Post Graduate Dental College of The State)

- Recognized by:  
Dental Council of India  
vide Govt. Gazette Notification No.  
V-12017/49/2001-DE dated 25/06/2008
- Awarded As The Best Dental College

Virbhadra Road, Post Office : Pashulok  
Rishikesh-249 203 (Uttarakhand)  
Mobile: +91-9837087627  
E-mail : sdchquery@gmail.com  
Web : www.seemadentalcollege.org

- Update the student by attending courses, conferences and seminars relevant to periodontics or by self-learning process.
- Plan out/ carry out research activity both basic and clinical aspects with the aim of publishing his/her work in scientific journals
- Reach to the public to motivate and educate regarding periodontal disease, its prevention and consequences if not treated
- Plan out epidemiological survey to assess prevalence and incidence of early onset periodontitis and adult periodontitis in Indian population (Region wise)
- Shall develop knowledge, skill in the science and practice of Oral Implantology
- Shall develop teaching skill in the field of Periodontology and Oral Implantology
- Principals of Surgery and Medical Emergencies.
- To sensitize students about inter disciplinary approach towards the soft tissues of the oral cavity with the help of specialist from other departments.

### SKILLS

- Take a proper clinical history, thorough examination of intra oral, extra oral, medical history evaluation, advice essential diagnostic procedures and interpret them to come to a reasonable diagnosis
- Effective motivation and education regarding periodontal disease maintenance after the treatment
- Perform both non-surgical & education regarding periodontal disease, maintenance after the treatment
- Perform both non-surgical and surgical procedures independently
- Provide Basic Life Support Service (BLS) recognizes the need for advance life support and does the immediate need for that.
- Human values, ethical practice to communication abilities
- Adopt ethical principles in all aspects of treatment modalities; Professional honesty & integrity are to be fostered. Develop Communication skills to make awareness regarding periodontal disease Apply high moral and ethical standards while carrying out human or animal research, Be humble, accept the limitations in his/her knowledge and skill, and ask for help from colleagues when needed, Respect patients' rights and privileges, including patients right to information and right to seek a second opinion.
- To learn the principal of lip repositioning and perio esthetics surgeries.

### ATTITUDE:

- Human values, ethical practice to communication abilities.
- Respect patient's rights and privileges, including patient's right to information and right to seek a second opinion.
